

# Our Secret Garden

While it may seem like a hidden secret PS 11's Hydroponics lab is alive and well. Led by 1<sup>st</sup> Grade Teacher Ms. Desirae Freeman the agriculture and life science curriculum for Grades 1 thru 3 was sadly put on pause for the academic 2020-2021 school year. We are hopeful that for the next school year (2021-2022) students in all three grades will again be able to engage in this robust and delightful curriculum. In the meantime, enjoy these pictures of the healthy and yummy variety of organically grown greens recently shared schoolwide.

Basil

Before

Wasabi Mustard Greens

After

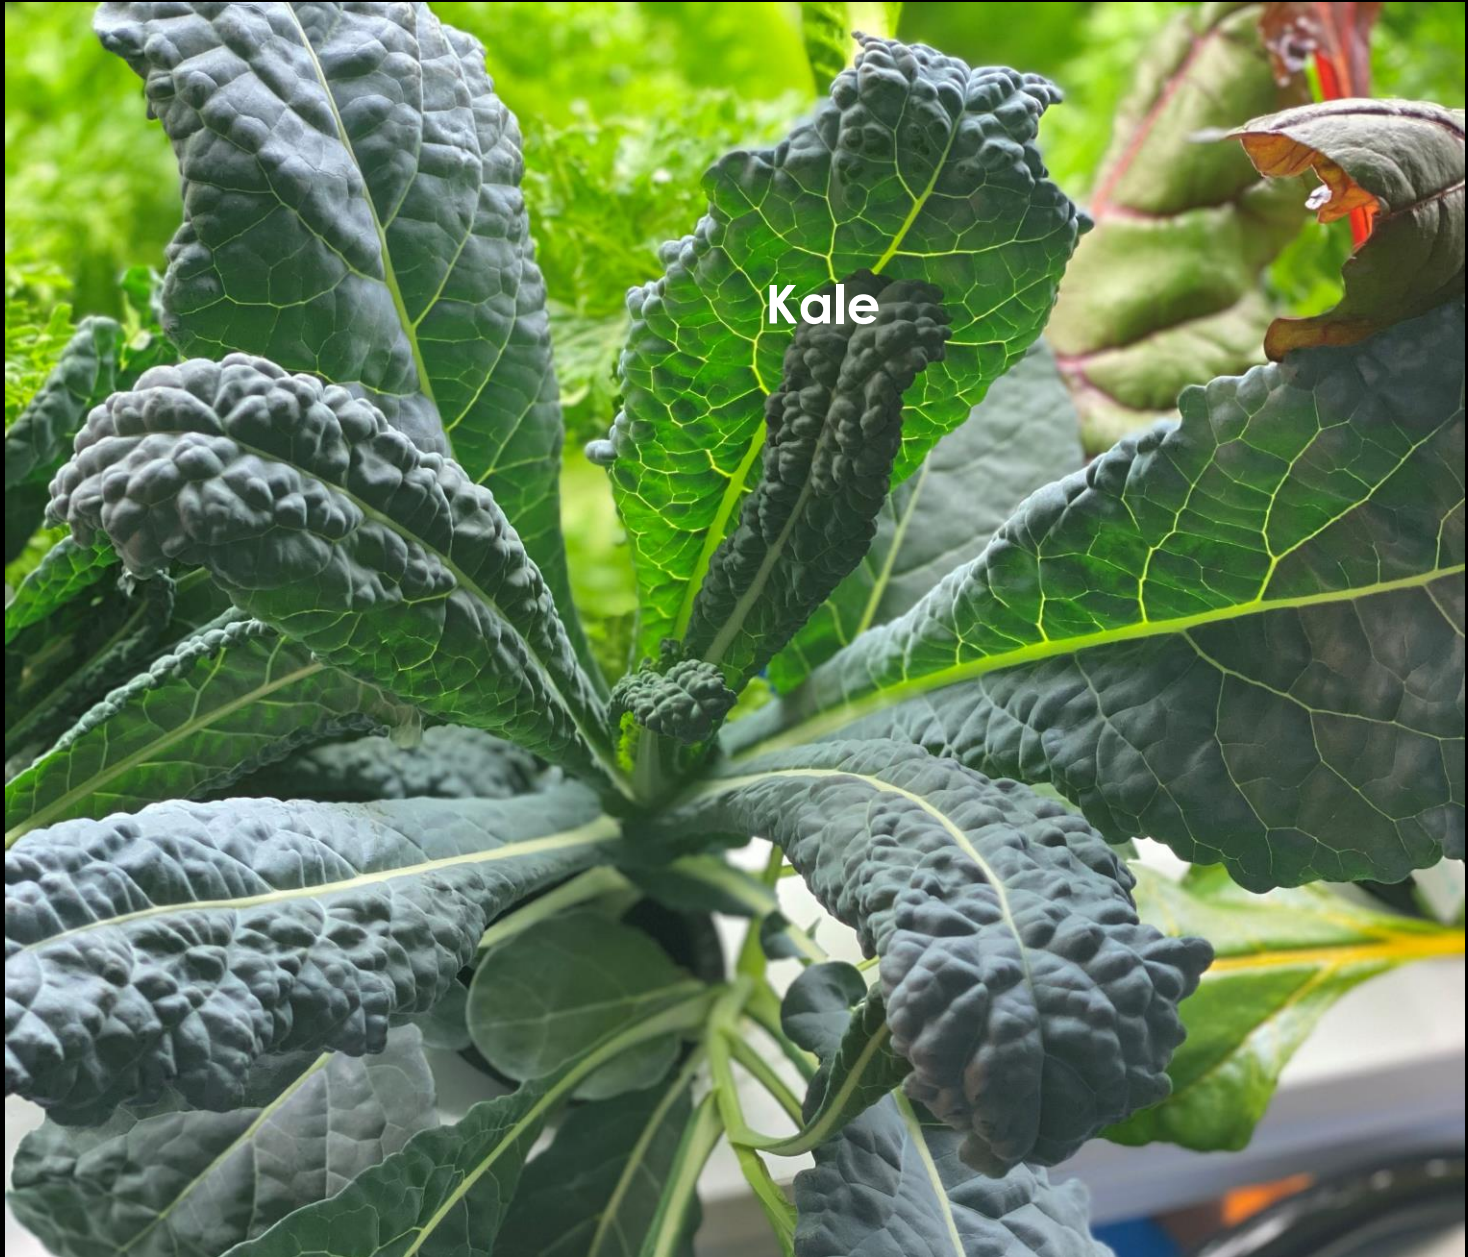

Basil

Swiss Chard

Sorrel

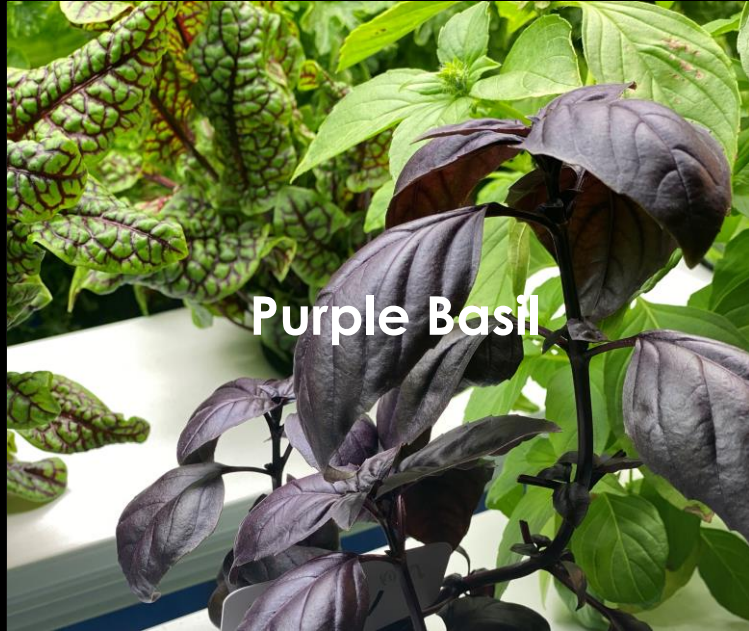

Kale

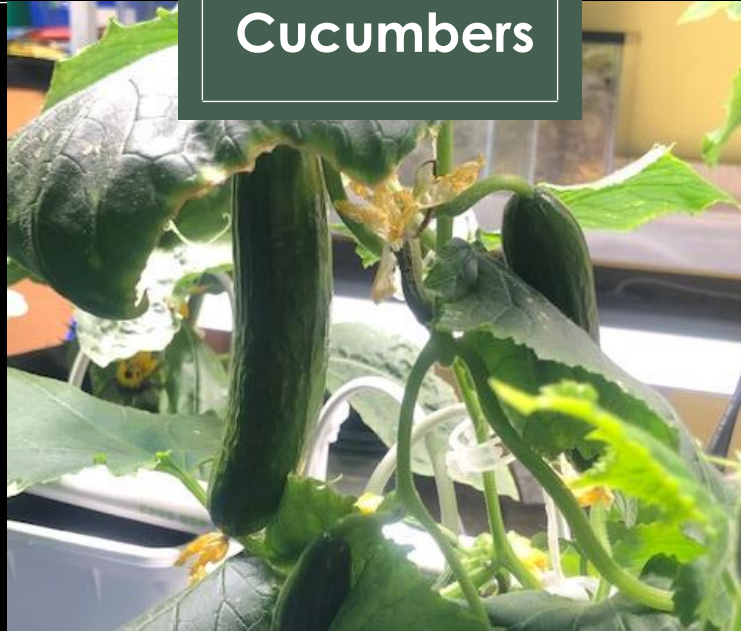

Fresh fruit and Greens To Go

## Cucumbers

Purple Basil

Sunflower
